# Louisiana Purchase Exposition, 1904

*See Department 2, page 47, for patriotic and fete days, daily and weekly memoranda.— Department 3, page 82, for Complete Guide and Map to the City of St. Louis.*

## BRIEF HISTORY

**The fourteen States** embraced in the territory acquired by the Louisiana Purchase are bounded on the east by the Mississippi River and are shown by the shaded portions of the map.

A little more than a hundred years ago, (1803), the United States purchased from France a territory which now embraces fourteen states and territories, valued at four hundred times the purchase price.

The original warrant for \$15,000,000.00 which was drawn on the United States Treasury in payment of what is known as the "Louisiana Purchase" will be on exhibition in the space devoted to the Treasury Department.

The territory in the original purchase, a million square miles, is larger in area than that of the Original Thirteen States. There are now more people residing in the City of St. Louis than occupied this entire territory one hundred years ago. The real significance of this purchase has become apparent, and St. Louis, realizing its own great commercial future in relation to this great expanse of country, decided to commemorate the purchase by an original and extensive World's Fair, officially known as the "Louisiana Purchase Exposition." The site chosen covers an area of 1240 acres, a tract one mile wide and two miles long.

The exposition will continue for a period of seven months, closing December 1, 1904. Prior to the opening of the Exposition, admission fee to the grounds was twenty-five cents; the uniform official fee is now fifty cents.

This great enterprise is destined to eclipse all other efforts in exposition building.

The gorgeous display of palaces, the iridescent beauty of its cascades, the general scheme of life and motion makes this gigantic undertaking an exposition hitherto unparalleled.

## THE PIKE (Midway)

### A QUAIN AND GORGEOUS PANORAMIC DISPLAY

(For location see \* Exposition Map, Part I, opp. page 5.)

"OFF THE TRAIL"

The Street of Concessions, known as the "Pike" is over a mile long, and is shaped like the capital letter E, the open end turned south toward the main group of Exposition Buildings. The concessions cost more than \$5,000,000.

### A TOUR OF THE WORLD

**Russia.** A trip to the heart of Russia on a Siberian railway.

**Japan.** The Emperor's gardens. A Japanese village, Jinrickshas.

**Spain.** The streets of Seville. The Alhambra, Gypsy Lane and Court of Lions.

**Egypt.** The brilliant and fascinating attractions of the famous streets of Cairo. A world of fun.

**China.** A Chinese village. Tea house, Joss house and theater.

**The Tyrol.** A typical village, gardens, halls, theaters, open air music stands and mountains.

**The Holy Land.** Occupies ten acres. Jerusalem with reproduction of the Mosque of Omar. Church of the Holy Sepulchre, Garden of Gethsemane, Mount of Olives.

**Ireland.** An Irish village, jaunting cars and characteristic architecture and industries.

**Special Features.** Deep sea diving; Submarine diving; Wonders of Liquid Air; Wireless Telegraph; Infant Incubator; Magic Whirlpool; Trained Animals; Galveston Flood; Grant's Cabin; A Trip to the North Pole; Palais du Costume; Naval Exhibit; The Creation; Fire Fighting; Old St. Louis, the city as it was in 1803.

## STATE BUILDINGS

Most of the state buildings are shown in the upper left hand corner of the map; a few of them being scattered through the center (See EX.)

## ENTRANCES TO THE GROUNDS

The entrances to the grounds are lettered in red, and shown outside of the boundary lines of the entire circuit (11 main entrances.) (See names in red.)

## INTRAMURAL TERMINALS

The approaches to all elevator stations, as well as Intramural Terminals, which make the entire circuit of the grounds, numbered from 1 to 32, in green, and are shown in green, parallel lines across the map. (See names in red.)

EX

## MAP OF Louisiana Purchase EXPOSITION

1,240 Acres. Cost \$40,000,000  
1903-1904

## LAIRD & LEE'S STANDARD Pocket Guide and Time-Saver

Exposition and City of St. Louis  
SEEN AT A GLANCE

## EXPOSITION PALACES

The Exposition palaces are numbered from 1 to 13, inclusive, and will be readily recognized as they are printed in red in the lower left hand corner of the map. (See EX.)

## PIKE (MIDWAY)

Concessions on the Pike (Midway) are shown on the map, commencing at the lower left hand corner, and extending to the center of the lower boundary line. (See \*)

## FOREIGN BUILDINGS

Most of the foreign buildings and shrines are designated in the lower center of the map. (See O.)

## SPECIAL EXHIBITS

The special exhibits are shown in the lower right corner of the map. (See K.)

## Hall of Festivals and Central Cascades

1900 ft. between the terminals of its curve.

(For location see Letter A Exposition Map, Part I., opp. page 5.)

As visitors enter the main avenue, a magnificent and extensive garden is presented to their view. One-half mile away is the Hall of Festivals, its dome larger than that of St. Peter's at Rome, 280 ft. above the level of the ground.

Its colonnades, 52 ft. high, stretch out 750 ft. each way, divided into seven sections on each side, in front of which are sculptured figures, representing in allegory the fourteen states and territories carved from the Louisiana purchase. At the end of the colonnades, beautiful pavilions have been erected for purposes of refreshment.

### Assembly Hall

This hall has a seating capacity of 3,500 people. Here will be found the largest pipe organ ever constructed. It has over 10,000 pipes and 140 stops.

Vocal and band concerts representing the world's greatest talent will be heard in this hall.

### The Cascades

From the center and two sides, three great cascades pour floods of water down a steep slope. The central series of cascades is 300 ft. long and 150 wide at the Grand Basin.

From the north side of the Hall of Festivals water gushes forth, spreading into a stream 50 ft. in width; then there is a fall of 25 ft., and then a series of cascades, covering a distance of 290 ft. Streams flowing from numerous cascades offer the visitor the opportunity of a boat ride for a mile.

## GOVERNMENT EXHIBIT

### **UNITED STATES GOVERNMENT BUILDING.**

756 ft. long, with central and end pavilions 250 ft. Cost \$450,000  
(For location see No. 9 Exposition Map, Part I, opp. page 5.)

 The name of the official in charge of each exhibit will be found at heads of the departments. 

A building designed for the Government by its architect, James Knox Taylor, is undoubtedly the largest structure ever erected by the United States at any exposition. It is twice the length of the Treasury building in Washington. The dome is 93 ft. in diameter, and forms the most imposing feature of the building. The central and two end pavilions, each 250 ft. long, are connected by two pavilions, 175 ft. wide. The interior is entirely free from columns. The situation of the building is a wooded plateau, south of the principal group of exposition palaces. Appropriation \$1,488,000.

### **Postoffice Department**

*J. B. BROWNLOW.*

A model institution is maintained in this department in the form of the Exposition postoffice. Here will be displayed the various methods employed by the government in the dispatching of official business. Methods of handling mail in Alaska, Porto Rico and Philippines are illustrated in detail.

Among other features is a model railroad car which will daily run into the Government Building.

### **Department of Agriculture**

*J. H. BRIGHAM.*

A most unique exhibit is found in this section in the form of a six acre map of the United States, paths upon the map corresponding to the boundaries of the states and territories. Appropriation for Agriculture College Exhibit, \$100,000.

A plot of ground is devoted to each state in which are growing plants, peculiar to, and representative of the state.

Numerous other interesting exhibits have been provided. For a more complete representation of Agriculture, the visitor is referred to the Palace of Agriculture.

## **Treasury Department**

*WALLACE H. HILLS.*

The exhibit which will undoubtedly attract the most attention in this section is the original warrant for \$15,000,000, drawn by the Treasury Department in favor of France in payment for the Louisiana Territory, the purchase of which is now being commemorated by the Exposition.

The life saving stations of the coasts and Great Lakes are well represented, and daily drills of life saving crews are a feature of the Exposition which will fascinate every observer. Cost of this exhibit \$8,000.

## **Interior Department**

*EDW. M. DAWSON.*

The Government has appropriated \$40,000 to illustrate the progress made by the Indians. Those who have had no opportunity to come in contact with the American Indian will undoubtedly enjoy the extensive exhibit provided in this section. 40 acres are devoted to this exhibit and Geronimo and Chief Joseph will be in attendance. Appropriation for exhibit for far off Alaska, \$50,000.

## **War Department**

*J. C. SCOFIELD.*

The exhibit of this department is extensive and at the same time opportune. Every American can not help but be interested in the life of our brave heroes, and in the comparison of the American soldier's equipment with that furnished by other nations.

## **Navy Department**

*B. F. PETERS.*

Only a small percentage of people have been afforded the opportunity of examining a modern man-of-war. In this section is found a large and complete model of a modern war vessel.

The movements of the various war vessels of the United States will be shown daily on a large chart.

## **State Department**

*WM. H. MICHAEL.*

This part of the Government exhibit includes numerous historical curios, among which may be found a pair of eyeglasses presented by Washington to LaFayette; famous letters, Washington's sword, and similar valuable relics.

## **The U. S. Fish Commission**

*Prof. W. de C. RAVENEL.*

The Government Fisheries Pavilion 135 ft. square, is 177 ft. southwest from the Government Building; a flight of steps connects the two buildings. Specimens are shown in glass tanks lighted from above, and the visitor views the exhibit from dark passageways. The exhibit of fish from the Atlantic and Pacific coasts, lakes and rivers of the United States and from the waters of our other possessions, surpasses all former efforts in this direction.

Other displays of a similar nature are found in the Fishery section of the Palace of Forestry, Fish and Game.

## PALACE OF AGRICULTURE

(500x1300 ft. Cost \$529,940.)

(For location see No. 11 Exposition Map. Part I, opp. page 5.)

The largest structure of the Exposition, occupying the most conspicuous site, is the Palace of Agriculture. It stands on a hill south of the Administration Building in the western part of the grounds, and covers over eighteen acres of floor space, and has four miles of aisles, being the largest building ever erected for a single exhibit. Its cornice line is fifty feet in height, and the structure looks down upon nearly all of the other palaces. It contains an auditorium which has a seating capacity of 1200 persons; also numerous committee and conference rooms, use of which is free to all associations and organizations interested in agriculture and the manufacture of agricultural products into commercial articles. A large reading room has been provided for the use of editors and representatives of papers as well as those interested in agricultural literature.

The exterior walls are tinted in green, relieved by garlands, wreaths and festoons of fruits and flowers.

### **Model Farm Equipment**

The various systems of farming, modern country dwellings, plans, general arrangement and equipment, appliances and methods in use in agricultural engineering are here shown in detail. Drainage, irrigation and machinery form an important part of this exhibit. A model farm, illustrating the rotation of crops and the various phases of forestry is exhibited by the United States Government.

### **Agricultural Chemistry**

The composition and comparison of soils, the analysis of waters, the value of farm products as foods for live stock, etc., as demonstrated in this exhibit can not fail to be especially valuable to every farmer.

### **Dairy—Marvelous Butter and Cheese Industry**

The latest construction for dairies, and processes of manufacturing butter and cheese are shown in detail. This exhibit includes the twenty-five best Jersey cows in the world. Over an acre is devoted to the butter and cheese industry. A cheese weighing two tons is on exhibition.

### **Machinery—Primitive and Modern**

A collection of all forms of implements and machinery, both ancient and modern, used in tilling the soil, cultivating and harvesting the various crops will prove interesting and instructive to all. This display covers four acres.

## **Entomology**

Not the least interesting and valuable display in the Agricultural Building is a systematic collection of vegetable parasites and insects. The numerous diseases of plant life are also very effectively illustrated. The various appliances and methods employed in destroying such parasites and overcoming the ravages of such diseases are well demonstrated. Silk worms, bees and their products are shown in detail.

## **Miscellaneous Farm Products**

Flax, jute and cotton are shown in their growth and in cultivation. Also the various processes of manufacturing them into marketable products. Medicinal plants, resins, oils and tannin are also included in this exhibit.

## **Live Stock Competition**

The live stock exhibit is in charge of Mr. F. D. Coburn.

Thirty-seven acres are devoted to domestic, farm and pet animals, and all parts of the country will be represented.

This display embraces five distinct events in the following order: 1. Exhibition of horses and mules. 2. Cattle. 3. Sheep. 4. Swine. 5. Poultry, dogs and pet-stock.

Auctions will be held for the first time in the history of a World's Fair, for the disposal of the best breed of stock the country can produce.

A distribution of more than 26,000 prizes has been provided for, arranged according to the importance of the various breeds and varieties entered.

## **Special Features**

The most important crops of the United States such as corn, tobacco, wheat, oats and sugar are displayed in the Grand Central portion of the palace. The tools used in the preparation of the soil, the harvesting, marketing, transforming and manufacturing these crops into various products are also shown in detail. This is a feature that has never before been demonstrated at any exposition.

The cotton exhibit, covering an area of one third of an acre, is in charge of the New Orleans Cotton Exchange. All of the cotton growing states are represented. The tobacco exhibit, occupying over 20,000 ft. of floor space, embraces every phase of the growth, curing and manufacture of tobacco as well as the machinery used in preparing it for the market. The same idea applies to corn and its manufacture into some forty different breakfast foods and other products. The cost of the corn exhibit is \$50,000.

Sugar syrup manufactures are well represented, and every phase of sugar production from the growth and cultivation of the cane and sugar beet to their manufactured forms is shown in an interesting and instructive manner.

"King Cotton" Statue 50 feet high.

500,000 Melons served free.

A statue of John Stewart in butter.

# PALACE OF HORTICULTURE

800 x 400 ft. Cost \$228,872.

(For location see No. 12 Exposition Map, Part I, opp. page 5.)

The building containing this exhibit covers 71 acres and consists of a central room 400 ft. square containing the Pomological display, and two wings 204 x 230 ft. extending on each side.

## Fresh Fruit

A collection of representative fruit from each state and territory indicates the extent and importance of this industry.

## Table Fruit

In the center of the building, will be found a unique display of table fruits.

In the Horticulture Department the different varieties of fruits from all states and countries are exhibited, affording a valuable opportunity for comparing specimens of the same variety from all sections of the country.

## Implements

Model green houses, heating apparatus, appliances and tools for cultivation of plants and for treating fungus growths, diseases and insects are found in the west wing. The cultivation of tea is also shown in this department.

## Conservatory

The exhibit of plants and flowers occupies space 204 x 230 ft. and 40 ft. high. A glass partition divides the conservatory from the Pomological exhibit.

## Out-door Exhibits

The out-door display of the Horticultural and Agricultural Departments occupies 69 acres. Among the special displays are the following: Ten acres of roses; Natural garden of wild-flowers; A bi-monthly exhibit of seasonable flowers; Four acres of fresh fruits; Louisiana's history told in flowers; The sunken gardens, 750 ft. long; Rainbow gardens, amid cascade; A floral clock with dial 100 ft. in diameter, the numerals 15 ft. high; on top of dial is a house containing the mechanism and on this is a 5000 pound bell striking the half hours. Illuminated at night by 1000 lamps.

## Palace of Forestry, Fish and Game

300 x 600 ft. Cost \$171 000.

(For location see No. 13, Exposition Map, Part 1, opp. page 5.)

Located midway between Palace of Agriculture and Administration Building in western part of grounds.

Its central nave is 85 ft. wide and 430 ft. long and is entirely free from columns. The east and west ends are 85x300 ft.

Its cornice line is 50 ft. above ground and apex of gable 74 ft. The building covers 4.1 acres.

In addition to several large aquariums, a pool 25x50 ft. is provided for large fish.

### **FORESTRY—Development and Protection**

The governmental method of tree planting and forest management is shown in the open, fifteen acres being devoted for this purpose. Many of the specimens displayed are not indigenous to this country.

Nearly 20 of our own states and territories in addition to many foreign countries are represented in this exhibit.

The Bureau of Forestry occupies a large space in one end of the building.

Peculiar phases of forest life and conditions, such as the big trees and sugar pines of California, Appalachian farm lands and forests, and results of tree planting are shown by colored transparencies.

Numerous photographs of trees, flowers and plants, features of scientific forestry, details of saw-mill work and that of the lumbermen, the economic use of the more valuable trees, as cedars, cypress, red-wood, spruce and the various pines, comprise a special display. This exhibit also includes the hard woods.

Products are illustrated in the form of cooperage, woodenware and basketry, gums and resins.

### **Other Features (Forestry)**

Outside forestry exhibit covers 15 acres. Germany and America have competitive exhibits of forestry. A plank from California 11 feet wide, 60 feet long. A tree that was 400 years old when Columbus discovered America is exhibited by North Carolina.

## **GAME FROM EVERY COUNTRY**

The display of hunting equipment from various countries is unusually complete, including native weapons as well as the more modern specimens of guns, revolvers, camping and hunting utensils. Hundreds of living game birds add to the attractiveness of the general exhibit, and are supplemented by some of the choice collections of the taxidermist's art. Many of the contributions are from private individuals, representing the country from the Atlantic to the Pacific, from Alaska and Canada to the Gulf. Nearly every known specimen of game is exhibited.

### **Other Features (Game)**

The outside live game exhibit covers ten acres.

A bird cage 300 ft. long, containing specimens of every specie of bird in North America shown with natural surroundings and foliage.

## **FISH AND AQUATIC ANIMALS**

The aquarium is located in the east end of the building, occupying a space 190 ft. long and 35 ft. wide. It has two lines of tanks separated by an aisle, fifteen feet wide. A series of pools have been provided for large fish and other aquatic animals.

The central pool is forty five feet in diameter and five feet deep. Many rare specimens of marine fish are exhibited in this pool.

In one of the state aquariums are displayed pike, perch, rainbow trout, black bass, and other familiar game fish.

In the center of this state exhibit is a pool containing an immense cat-fish. The west wall is handsomely decorated to represent the forest and its game.

The immense salmon fisheries of the Pacific coast will be comprehensively exhibited, showing in a vivid manner the methods of salmon hatching.

There are two distinct fishery exhibits, one in this building and another in the annex to the Government structure.

## **Art — Realistic Reproductions from Nature**

Numerous oil paintings, photographs and drawings, representing hunting, fish and game of all descriptions will charm the lover of the artistic.

Different forms of hunting and fishing appliances, such as modern netting, artificial flies, reels and tackle will also be on exhibition.

## **Miscellaneous — Splendid Specimens of the Finny Tribe**

The space allotted to fish and game is a little more than two acres in extent.

The fact that one country is represented by 300 exhibitors, and another foreign country by 9000 separate items, gives a good idea of the extent of this exhibit and the general interest manifested by the people from all parts of the world.

One state alone endeavored to secure five acres on which they desired to exhibit thirty species of its animals, but space would not permit.

## PALACE OF FINE ARTS

Total frontage 836 ft. Cost \$987,727.50.

(For location see No. 10 Exposition Map, Part I, opp. page 5.)

The Palace of Art properly consists of a group of buildings situated upon a wooded plateau sixty feet above the general level, just behind the Hall of Festivals above the Cascade gardens.

The buildings are so arranged as to form a large central court. They contain a total of 134 galleries, besides two halls devoted to sculpture. The central building is of fire-proof construction and is 346 x 166 ft. in area. It will remain as a permanent monument to the Exposition. The side pavilions are 420 x 422 ft., and contain many galleries.

The Hall of Statuary is 100 x 150 ft., and is arranged with galleries on both sides for paintings and works of art.

Total area is 5.6 acres.

The department is in charge of Mr. Halsey C. Ives.

### Contemporaneous Division

This division includes works produced since the World's Columbian Exposition in Chicago, and these exhibits are in competition for awards which will be made by an international bureau. Various schools are represented, giving the visitor a good idea of modern art.

### Retrospective Division

This division covers works produced since the purchase of the Louisiana territory, and prior to 1893.

In this department will be found many of the important masterpieces, loaned from American collections, both public and private.

### Miscellaneous

Almost every country in the world is represented in this department, and the space originally asked for far exceeded the area set apart for the purpose.

The art exhibit as a whole surpasses in quality that of all previous international exhibitions.

Painting, sculpture, etching, engraving, lithographing, architecture and all the forms of applied art are included in this exhibit.

## PALACE OF LIBERAL ARTS

750 x 525 feet. Cost \$497,917.

(For location see No. 7, *Exposition Map*, Part I. opp. page 5.)

One of the really great specimens of Exposition architecture is the building devoted to Liberal Arts.

It has been constructed without galleries, and contains the treasures of science and industrial art.

The entrance is in the form of a magnificent triumphal arch. The height of the doorway is ninety feet, and the Ionic columns on both sides of it are said to be the largest ever constructed, being nearly one hundred feet from base to top.

Its sculptured corner pavilions rise majestically above colonnades of huge Doric columns.

The building covers an area of nine acres. Mr. John A. Ockerson is in charge of this department.

### Typography and Art of Printing

The wonderful development in Typography, and the art of Printing and Binding during the last century is shown by operative exhibits in the section devoted to graphic arts.

Among them are a complete type foundry, a photo-mechanical engraving plant, electrotpe foundry; a model printing office, showing the various processes of color printing, together with the different forms of machine type setting, hand composition and casting devices.

Specimens of printing, lithographing and engraving, artistic photographs, maps, globes, newspapers and old books, are found in the space devoted to printing and newspapers; also a special exhibit has been made by manufacturers of paper. No one exhibit represent the world's progress as forcibly as this display.

### The World's Best Literature

The most fascinating exhibit, perhaps, is the remarkable display of literature, showing the wonderful progress made in the art of book-making.

Here are represented all kinds of books from the ancient Chinese manuscript, printed from movable wooden blocks, invented before the birth of Guttenberg to the exquisite modern productions of the latest improved machinery.

The display of books from the prominent publishers of the country is especially interesting. The visitor will see and marvel at the wide range of literature, embracing fic-

## **PALACE OF LIBERAL ARTS — Continued.**

tion, educational books, — technical and scientific, — dictionaries and works of reference. All forms of binding from the paper covered edition to the choicest specimen of the binder's art, embracing the entire range of the world's literature, are included in this magnificent collection.

### **Medicine and Surgery**

A hospital equipped with every modern appliance used in surgery, has been provided. Medicines, medical and surgical instruments and appliances, showing the wonderful strides made in medicine and surgery during the past century is an exhibit that will attract the attention of all.

Methods of treating disease by means of electricity, X-rays and the Finzen light will also be demonstrated.

Well-known physicians and trained nurses will be in constant attendance, and those needing medical attention while on the grounds will be taken care of at the Exposition hospital.

### **Instruments**

Here is found a complete display of surveying and mathematical instruments and appliances, used by engineers and draughtsmen.

An immense equatorial telescope, weighing 4,000 pounds, (12 inches), is surrounded by geodetic and astronomical instruments. This group is No. 19.

In a reproduction of an old German house is found a complete alchemist's library.

Musical instruments, from a self-playing piano and piano player to the most crude instruments of by-gone ages, are here represented.

### **Foreign Exhibits**

Commercial nations of Europe and other foreign countries have contributed extensively with exhibits, representing many important industries.

The comparison of ancient Egyptian methods of irrigation with the more modern engineering feats in connection with the Nile form an interesting and instructive study.

Among other notable displays in this building are many ancient manuscripts and books made thousands of years before the birth of Guttenberg. These, together with many contributions from museums, plants, costumes, musical instruments and other curios, are contributions from the Orient.

### **Miscellaneous Display**

Chemicals, paints and pharmaceutical preparations, coins, metals, weights and measures, theatrical material, adding machines, cash registers, building material, elevators, models of public works, and thousands of other machines, tools and appliances are housed by this, the most imposing structure of the Ivory City.

Achievements in Civil and Military Engineering and architecture, displaying some of the greatest public and private works, triumphs of engineering skill, are also found in this building.

# PALACE OF EDUCATION

525 x 750. Cost \$367,362.98.

(For location see No. 6 Exposition Map, Part I, opp. page 5.)

The Palace of Education, a type of modern classic architecture, covers nine acres of ground and is located in the heart of the exposition near the Cascade Gardens, and is surrounded by the Lagoon System; the approach is over an ornamental bridge.

The building is surrounded by a magnificent colonnade, the height of columns being 50 ft., adding strength and beauty to its appearance.

Its general shape is that of a key stone, with a northern facade 758 ft. in length, and southern facade of 450 ft.

## School Equipment

The manufacturers of school furniture and appliances and publishers of educational works have their exhibits located in this building.

Their display is larger, more interesting and instructive than any hitherto placed before the public.

## Business Equipment

The more material and practical methods have not been neglected.

One innovation is a practical demonstration of methods used in educating the deaf and the blind, as well as those who are defective in other respects.

A model school is in actual operation on the grounds.

## Social Economy

The condition of industrial workers, public health, charities, the liquor question, municipal improvement, co-operative institutions, and social conditions in general are all represented under the exhibit known as Social Economy.

## Miscellaneous — Special Education

Another innovation in educational exhibits is that found in group five. Special education in agriculture, horticulture and mechanical colleges and experiment stations, are here represented by a quantitative exhibit demonstrating the methods of instruction and advantages accruing from such education. Congress has appropriated \$100,000 for this exhibit.

## PALACE OF MANUFACTURES

525 x 1200 feet. Cost \$719,399.

(For location see No. 5 Exposition Map, Part I, opp. page 5.)

The Palace of Manufactures with its Colonnades and loggias, forms an important part of the general architectural picture. The building which covers an area of fourteen acres is richly embellished with statuary.

The capacity of the building is much greater than that of the Paris Palace of Varied Industries.

The foreign exhibits are especially complete. France, Germany, Italy, Austria, China and Japan vie with each other in making the most elaborate and imposing display ever made at any exposition.

### Cutlery of Every Description

The most extensive variety of table cutlery ever exhibited charms the eye and holds the interest of every visitor to this particular section.

Processes of manufacture from the crude material, grinding and polishing are shown in detail.

### Jewelry — Beautiful, Ornamental, Valuable

The appliances and processes for making countless varieties of jewelry are systematically arranged so that the observer may intelligently follow the operations and the results obtained.

The display of articles made from the precious metals for religious use is especially interesting. Some of the finest specimens of enameling may be found in this exhibit.

### Precious Gems

Every variety of ornament used by civilized society is on exhibition in this group. Large collections of precious stones and the rarest diamonds in existence and many other interesting features are found in this exhibit.

The processes of diamond cutting, engraving on fine stones and cameos, will prove highly interesting. Here may be found all forms of jewelry made from steel, jet, coral, amber and "mother of pearl."

### Horology — Modern Watches and Clocks

In this department may be seen the highest types of horological workmanship, including clocks run by electricity, air and water.

The most beautiful collection of watch cases ever displayed constitutes one of the principal exhibits of this group.

**"PROGRESS OF MANUFACTURES."**

### **Porcelains—Rare and Unique**

Nearly every visitor to the exposition will be attracted by the rare collection of ceramics. Unique pottery and valuable porcelains from the world's best artists, domestic and foreign, are shown in this section.

### **Toys — A Marvelous Collection**

The exhibit of toys reveals remarkable skill and ingenuity in this particular line. The display of mechanical toys is especially fascinating.

### **Textile Fabrics — Silks and Woolens**

The magnificent display of silk from foreign and domestic factories will no doubt prove one of the most brilliant features of the Universal Exposition.

All kinds of fabrics, manufactured from woolen, cotton and other material; velvets, ribbons and laces are exposed in their various stages of manufacture from the raw material to the exquisitely finished product.

## PALACE OF VARIED INDUSTRIES

625 x 1200 ft. Costs \$712,679 60.

(For location see No. 3 Exposition Map, Part I, opp. page 5.)

The Palace of Varied Industries is one of the larger exposition buildings, and is symmetrically placed with the Palace of Manufactures in the main group of buildings. It covers 14.5 acres.

Domes and towers rise from each of its corners, and its main entrances are massive, lofty and imposing.

The graceful curves, ovals, arcs, and the almost entire freedom from angles, with its balanced lines and perfect symmetry stamp the architecture as decidedly French, but its Ionic colonnade with the high pedestals of its columns balance the cornice and give the building a decided individuality.

War, industrial art, poetry and the drama—all may be interpreted from this richly embellished structure.

### Exhibits Varied Manufactured Products

The exhibits of this building supplement those of the Palace of Manufactures.

In the latter building, processes and methods of manufacture are shown while in the Palace of Varied Industries are displayed the products of the various industries, combining art and handicraft, such as pottery, cut glass, jewelry, clocks and watches, furniture and art work.

### Miscellaneous—Factories In Operation

Among other things, relating to manufacturing, located in various parts of the grounds, are found the following factories in operation;

Pen factory. Hat factory.

Shoe factory. Paper Box factory.

Imitation Diamond factory.

The manufacture of nitrogen from the air.

Art Pottery Works.

Gem cutting, grinding and polishing.

One of the most useful and interesting exhibits is that of tapestries, upholstery, and stained glass. The most famous factories in the world are represented. Wall paper and articles for interior decoration, furniture and art works are also handsomely displayed.

# **PALACE OF MINES AND METALLURGY**

---

525 x 750 feet. Cost \$498,000.

(For location see No. 8 Exposition Map, Part 1, opp. page 5.)

---

## **Mines and Metallurgy**

The architecture of this building is that of the modern Renaissance with an addition of many features. The building covers an area of about nine acres, and is 60 ft. high to the cornice. The walls of the building and three of the sides are set back twenty feet from the facades, leaving an intervening space or loggia, the base of which consists of sculptural design illustrating various operations such as quarrying, mining, etc.

Twelve acres are devoted to a mining gulch, south of the building. Dr. J. A. Holmes is in charge of the exhibit.

Books, maps, charts and photographs, illustrating geology, underground topography and mining details, are in abundance. Relief maps, statistics, models, and working plans of mines have also been installed.

## **Mining—Placer, Quartz, Hydraulic**

A large collection of ores and minerals, together with exhibits illustrating the processes of treatment, are shown in actual operation. Large quantities of ores and minerals are shown in their rough, sawed and polished states. Various classes of rock, glazed ores, gems, precious stones, and mineral fuels, illuminants and fertilizers are also included in this exhibit.

Space is provided for systematic collections in mineralogy, geology, paleontology, and crystallography.

## **Mining Machinery**

Machinery used in mining, quarrying, drilling, hoisting, drainage, illumination and ventilation are shown in the form of working models. Such a display, which under ordinary circumstances would be unattractive, in this manner becomes intensely interesting.

The manufacture of refractory materials such as fire-proof brick, crucibles, retorts, gas generators, furnaces, treatment of ores, manufacture of iron and steel ingots, the refining and carburization of metals form an instructive and valuable exhibition.

## **MINES AND METALLURGY — Continued.**

**NORTHWEST CORNER MINES AND METALLURGY PALACE.**

### **Electro-Metallurgy**

This is one of the most important features of this exhibit. The out-door display consists of 12 acres.

Tunnels and drifts have been driven into the hill which constitutes a portion of this space. A coal mine located on a two-foot seam of coal, discovered within the exposition grounds, and a lead, zinc and copper mine are shown in actual operation.

Pumps for drainage, cars for transportation of ores, illuminating and ventilating systems may be examined in detail.

These mines are connected by an electric railway, two-thousand feet in length.

### **Collective Exhibits**

The mineral resources of the country, the coal fields of the east and middle west, the products of the iron and steel industries, and the manufacture of bricks will be illustrated by a series of exhibits.

### **Educational Features**

A fully equipped assay office will be in charge of students and experts.

Liberal space has been allotted to the display of technical and scientific books, models, and geological maps, pertaining to this subject.

### **Miscellaneous—Gems, Minerals, Metals**

The visitor will also find the following exhibits located in various parts of the ground: Gem polishing and grinding. A turquoise mine, a coal mine, a placer-gold mine in operation. An operating lapidary. An assay office. A Pennsylvania coal breaker. A collection of gems and rare metals. A primitive Mexican copper mine. An Idaho opal mine. An Idaho silver nugget weighing ten tons. A cluster of 150 pearls, valued at \$100,000 found in Shark's Bay West Australia. Systems for producing gas. The Missouri method of smelting ores. Vulcan's statue, coal, coke and iron, 50 ft. high.

# PALACE OF ELECTRICITY

750 x 525 ft. Cost \$415,352.11.

(For location see No. 4 Exposition Map, Part I, opp. page 5.)

This building, fronting upon the Grand Basin, is constructed in the shape of a key stone, and is a type of the Corinthian style of architecture. Its shortest side is about 450 feet, and faces the south. It covers nine acres, is surrounded by lagoons, and is approached by means of bridges. Mr. W. Elwell Goldsborough is chief of this department.

## Electro=Chemistry

Electrolytic productions, the manufacture of nitric acid from air, and various other electro-chemical processes are demonstrated in this building.

Different types of storage and secondary batteries, including the newest form of battery invented by Edison, are also found in this department.

Nernst, Osmium and mercury vapor lamps are a part of the exhibit that will attract a great deal of attention.

The process of manufacturing incandescent lamps, including the "flashing process" in which the filaments are carbonized, will be of great interest to electricians.

## Electric Power

The newest types of machines for the generation and application of electricity will be found in this building. A large display of electrical generators will also be found in Machinery Hall.

Telegraph and telephone systems are well represented, and multiplex telegraphy is shown in commercial operation.

## Wireless Telegraphy

One of the most prominent electrical exhibits is that of wireless telegraphy, which embraces the largest station in the world.

Commercial messages may be sent from the Exposition grounds by wireless telegraphy to many large cities.

The steel tower for the system is located on the east side of the grounds near the Press building, and is connected with a station in the Palace of Electricity, and another on a hill near the American Reservation.

The latter station has two masts, 200 feet apart and 200 feet high, upon which are wireless telegraphic apparatus.

The tower is 250 feet high. Possible methods of demonstrating wireless telephony will prove an opportunity which few will fail to take advantage of.

## PALACE OF ELECTRICITY—Continued.

GROUND PLAN OF ELECTRICITY BUILDING.

### Electro-Therapeutics

The application of electricity for therapeutic purposes has not been neglected in this exhibit, and the latest inventions along this line will prove a revelation to the average visitor.

The purification of water for drinking purposes by electricity is shown on a large scale.

X-rays, Crookes tubes, fluroscopes, Finsen light outfits and all the appliances for the medical adaptation of electricity are exhibited and shown in actual use.

The acoustican, an instrument which enables the deaf to hear will also be demonstrated.

### Electric Machines

Alternating and direct current dynamos and motors, rotary converters, transformers and regulators of every form and make will be arranged and connected so as to illustrate their use.

The application of motors to the many forms of power machines will also be demonstrated.

### Electric Railways

In addition to the display of motors, controllers, switch boards and similar apparatus, an outdoor exhibit occupies 1400 feet of double track upon which tests of speed, braking and efficiency will be made.

## PALACE OF MACHINERY

525x1000 ft. Cost \$510,086.14.

(For location see No. 2 Exposition Map, Part I, opp. page 5.)

This structure is situated south of the Transportation Building, and west of the Palace of Electricity. It covers an area of 12.2 acres.

One of its principal architectural features is its numerous types of graceful German towers.

The building was designed by Widman, Walsh and Boisselier.

In the west end of the building is an immense power plant, developing nearly 40,000 HP. All the power used for lighting, driving exhibits, machinery and pumps for the cascades is controlled from the great switchboard on the west wall of this building.

The engines, condensers, pumps, moving machinery and accessories, which constitute the power plant, are on the main floor, occupying in area over 200,000 square feet.

### Engines— Gas, Steam, Turbine

Approaching from the north, through the central entrance, is found a reciprocating steam engine of 5,000 HP., 54 ft. in height including its base; 20 ft. of which are depressed below the floor level, and the remaining 34 ft. elevated above it. The base is 45x35 ft. The foundation for it cost \$6,000.

The weight of the engine and its electric generator is 500 tons, and their value is \$150,000. The main shaft of the engine has 85 revolutions per minute.

An ordinary city residence with a street frontage of 25 ft., and with a depth of 60 ft., three stories above ground, with basement and sub-cellar below ground, would no more than equal the cubic space occupied by this immense engine.

As the visitor proceeds through the central portion of the building toward the west, he observes in succession a 1750 HP. Gas engine from Germany; a 600 HP., high speed steam engine from Harrisburgh, Pa.; a 750 HP. medium speed steam engine from Cincinnati; a 1,000 HP. slow speed steam engine from Burlington, Ia.; a tangential water wheel from San Francisco, operated by water forced through a pipe and nozzle by steam, pumped at the rate of 1200 gallons per minute under the pressure of 300 pounds to the square inch.

## Palace of Machinery —Continued.

The water striking the buckets of the wheel, transmits its energy, and falls as if poured from an ordinary basin.

The water wheel revolves at a rate of 900 revolutions per minute.

The exhibition of the steam turbine marks an era in the manufacture of engines. The successful invention of this engine has for generations been considered on a par with the solving of the problem of perpetual motion. Its guaranteed horse power is equal to a line of horses, harnessed tandem, eighteen miles in length.

### Gas Motors

Another wonderful achievement is the great Belgian Gas Motor of 3,000 HP.

An exhibition of the same builders of a gas engine of 600 HP. at the Paris exposition, caused more comment than any other single object.

This engine covers a space of 85 ft. long, and 45 ft. in width, and develops five times more power than the engine exhibited at Paris.

The fly wheel has a diameter of 28 ft.; weight 34 tons; its rim travels at the rate of  $1\frac{3}{4}$  miles per minute.

Its two pistons each travel ten feet with every complete stroke, each making 100 strokes per minute. A medium size horse could be driven through its cylinders. Shipping weight is 300 tons, and 30 tons of coal per day are consumed, in the generation of gas necessary to operate it.

### Machine Tools, Electric Generators

The smallest machines for manufacturing tiny screws, from delicate watch wheels to the gigantic lathes which turn the immense cannon used in the American Navy will fascinate every lover of machinery. Some of these monster machines are seventy-five feet long and nearly twenty wide.

A full line of wood working tools and appliances from the delicate lathe to the massive machines of the saw mills are also in this section.

In the north-west corner of the building is found a 1,500 HP. French reciprocating steam engine with a main shaft making 339 revolutions per minute. This engine is coupled to an electric generator, operating in parallel an alternating current arc lighting service with a generator built in France, directly coupled to a tandem, 1,0000 HP., and compound steam engine from Germany.

The exhibits found in the Hall of Machinery and its annex will prove of intense practical interest to every engineer, and will fascinate every visitor regardless of their technical knowledge or experience.

## PALACE OF TRANSPORTATION

525 x 1300 ft. Cost \$696,000.

(For location see No. 1 Exposition Map, Part I, opp. page 5.)

The Transportation Building designed by E. L. Masqueray and covering fifteen acres of ground is of rectangular shape and is the largest building in the main group of palaces. Great arches constitute the main feature of the building and sixty doors open upon its wealth of mechanical treasures. It is considered one of the most beautiful structures on the ground. All the exhibits are on the main floor.

### Railroad Exhibits

The building contains four miles of tracks for the display of railway cars and locomotives. A turn-table elevated above the level of surrounding exhibits, bears upon it a mammoth locomotive weighing 200,000 pounds, the wheels of which revolve at great speed, while the table is turned by electric power, carrying the engine round and round. The electric head light project's its beams throughout the entire building. This massive and most beautiful exhibit bears the inscription, "The Spirit of the Twentieth Century". The driving wheels of locomotives exhibited, are operated by compressed air; The cardinal idea of the exhibit throughout the entire building being that of light and motion.

### Scientific Tests—Marvelous Speed

A new departure has been inaugurated which early attracted the attention of the entire scientific world.

A series of laboratory tests of locomotives, involving the most interesting types of modern domestic and foreign engines will be conducted by experts. The attendance of the leading mechanical engineers of the world is assured.

Among these tests is a locomotive whose wheels revolve at a rate of eighty miles per hour, while the locomotive remains stationary. This test takes place at a certain time each day and is a part of the Pennsylvania Railroad exhibit.

The exhibit of the Baltimore and Ohio Railroad embraces a retrospective and contemporaneous display of great educational value,

A Union ticket office will be in operation in this building during the exposition.

**"ELECTRICITY"— THE MODERN MOTIVE FORCE.**

### **Vehicles— Automobiles, Carriages, Bicycles**

Automobiles, motor cars, representing the most noted manufacturers of Europe and America, together with every form of carriage, wagon and truck are here exhibited.

Saddlery and Harness are also displayed in their numerous forms in this building, as well as material used in mercantile, marine and naval service.

### **Marine Exhibit**

Not the least important feature of this display is the marine and naval exhibit. The old style crafts of the Mississippi, the strange boats of the Far East, mammoth steam ships and modern men-of-war are shown in all their picturesqueness.

### **Aerial Navigation**

The Exposition Commission has offered a prize of 100,000 for an airship which shall make the best record over a course marked by captive balloons at a speed of not less than twenty miles an hour.

## ADMINISTRATION BUILDING

Cost \$250,000.

(For location see Letter B Exposition Map, Part I, opp. page 5.)

The Administration Building, containing over 50 large offices, is occupied by the various executive and exhibit departments of the exposition. The presidents, secretaries, directors and chiefs have their offices located here.

The architecture of the building presents a clean front in sharp contrast to the other decorative palaces. The carvings in stone belong properly to the Tudor style and age. The stone is a pink Missouri granite, trimmed with Bedford lime stone. The building is said to be fire-proof, and it will remain as a permanent structure for the use of the Washington University.

It is well to show what has been accomplished during the past thirty years in Exposition building by making a comparison of the Ivory City with other similar events:

### Comparison of Famous Expositions

<i>Year.</i>	<i>Exposition.</i>	<i>Grounds.</i>	<i>Under roof.</i>	<i>Cost.</i>
1876	Philadelphia	236 acres	*12 acres	
1893	Chicago	633 "	82 "	\$27,250,000
1894	San Francisco	160 "	*8 "	1,193,260
1895	Atlanta	125 "	*7 "	2,500,000
1897	Nashville	180 "	*10 "	473,948
1898	Omaha	158 "	9 "	1,972,194
1900	Paris	336 "	*15 "	20,000,000
1901	Buffalo	350 "	15 "	10,000,000
1902	Charleston	185 "	*10 "	
1904	St. Louis	1240 "	128 "	40,000,000

Nearly ten times the size of the Buffalo Exposition in point of floor space; twice as large as that of the Chicago Columbian Exposition; more than three times larger than the last Paris Fair, and nearly ten times larger than the exposition at Omaha, Charleston, San Francisco, and Atlanta.

\* Estimated.

# TEMPLE OF FRATERNITY

200 x 300 ft. Cost \$200 000.

(For location see Letter D Exposition Map, Part I, opp. page 5.)

The idea was advanced in the early part of 1901 that the fraternal organizations should represent their growth and strength at the Universal Exposition.

This idea developed until crystallized in the form of the present Temple of Fraternity.

Contributions for the erection of the building came from members of fraternal societies located in all parts of the country.

The building is in the form of a Greek temple and contains eighty rooms.

## Fraternities of the World

Other organizations, the by-laws of which, prohibit official meetings outside of the cities in which National headquarters are maintained, have arranged for special meetings at the Exposition.

In addition to the convention buildings, over twenty Exposition halls with seating capacity for from 150 to 15,000 persons are available.

Many of the city hotels also have numerous assembly rooms which will be utilized for convention purposes.

The delegates who will attend the various conventions and meetings range in number from 100 to 50,000. Many lodges and organizations not mentioned are expected to perfect their plans so that dates for their meetings and conventions can be announced after the commencement of the Exposition.

## CONVENTIONS

Ancient Order of United Workmen.....	Oct. 27
Associated Fraternities of America.....	Sept. 20
Bankers' Union of the World.....	Oct. 24
Catholic Knights of America.....	Sept. 13
Columbian Knights.....	Oct. 7
Catholic Women's Benevolent Legion .....	Oct. 12

## Conventions—Continued.

Degree of honor.....	Oct. 27
D. O. K. K.....	Aug. 24
Eastern Star.....	Oct. 25
Eagle Day.....	Aug. 31
Forester's Teams, Modern Woodmen of America..	Sept. 5-9
Fraternal Bankers of America.....	Sept. 20
Fraternal Union of America.....	Oct. 14
Fraternal Mystic Circle.....	Oct. 22
Fraternal Aid Association.....	Sept. 2
Home Circle.....	Sept. 15
Improved Order Red Men .....	Sept. 17
Improved Order of Heptasophs.....	Aug. 30
Junior Order W. American Mechanics.....	June 23
Knights and Ladies of Security.....	Sept. 29
Knights of the Loyal Guard.....	Oct. 3
Knights of Columbus.....	Oct. 12
Knights of Honor.....	June 30
Knights of Maccabees Uniform rank.....	Aug. 22-27
Legion of Honor.....-.....	July 1
Modern Woodmen of America.....	Sept. 8
Modern Maccabees.....	Sept. 16
Mystic Workers of the World.....	Sept. 21
Mystic Toilers.....	Oct. 15
Maccabees ..	Sept. 28
National Protective Legion.....	Sept. 19
National Fraternal Congress..	Sept. 27
National Society N. S. Daughters.....	June 7
Native Sons and Daughters of Kansas.....	Sept. 29
Order of Mutual Protection.....	Sept. 10
Order of Americus.....	Sept. 23
Order of Washington.....	Sept. 23
Order of Eastern Star.....	Oct. 25
Order United Commercial Travelers of America..	June 3
Protected Home Circle.....	Oct. 1
Pythians .....	Aug. 22
Royal Neighbors.....	Sept. 7
Royal Arcanum .....	May 28
Royal League.....	June 28
Rathbone Sisters .....	Aug. 23
Sons and Daughters of Justice.....	Sept. 3
Sons of American Revolution .....	June 15
Senate National Union .....	Sept. 24
Supreme Tribe of Ben Hur.....	Oct. 21
Temple of Fraternity....	Sept. 26
Travelers' Protective Association .....	June 10
United Commercial Travelers.....	June 30
United Order of Foresters.....	July 18
Woodmen's Modern Protective Association.....	Sept. 6
Woodmen of the World .....	Sept. 14
Woodmens' Circle.....	Sept. 14
World's Fraternal Congress .....	Sept. 30

## HALL OF CONGRESSES

257 x 46 feet. Cost \$250,000.

(For location see Letter C Exposition Map, Part 1, opp. page 5.)

One of the prominent buildings used by the Exposition is the Hall of International Congresses, situated west of the Administration Building.

In addition to the main building, an assembly room, 100 feet by 41 feet extends back from its center.

One of the large assembly halls, dimensions of which are 100 by 46 feet, will be used by most of the large congresses. Other congresses and conventions will be held in the lecture halls and assembly rooms of the buildings surrounding the quadrangle.

### Congresses—International

The following International Congresses will be held on the dates given:

Aeronautic.....	Unfixed
Dental.....	Aug. 29-Sept. 3
Educational.....	July 5-9
Electricity.....	Sept. 12-17
Engineering.....	Oct. 3-9
Instruction of Deaf.....	Oct. 17-20
Lawyers and Jurists.....	Sept. 29-Oct. 1
Press.....	May 16-21
Peace.....	Unfixed
Parliamentary.....	"
Sunday Rest.....	Oct. 12-14
Temperance.....	Oct. 10-15

### Program of Convention Subjects

The official arrangement of conventions has been grouped under special subjects as follows:—

Departments I. Philosophy; II. Mathematics; III. Political and Economic History; IV. History of Law; V. History of Language; VI. Literature; VII. Art; VIII. Religion; IX. Physics; X. Chemistry; XI. Astronomy; XII. Sciences of the Earth; XIII. Biology; XIV. Anthropology; XV. Psychology; XVI. Sociology; XVII. Medical Science; XVIII. Technology; XIX. Economics; XX. Politics; XXI. Jurisprudence; XXII. Social Science; XXIII. Education.

## PHYSICAL CULTURE

(94 x 182 ft.)

(For location see *Letter E Exposition Map, Part I, opp. page 5.*)

One of the buildings erected for Washington University is used as Physical Culture headquarters. It is located in western part of grounds.

The athletic field has a track  $\frac{1}{3}$  mile in circuit and seats have been provided for 25,000 people.

The gymnasium is supplied with the most elaborate apparatus. Conventions will be held and the best authorities on physical culture will conduct a series of lectures.

Nearly every civilized country will be represented in this department which is in charge of Mr. James E. Sullivan.

A trophy room containing the great prizes contested for in the history of athletics is one of the features of this exhibit.

### Play Ground

A model has been installed, providing a place where children can amuse themselves during the day.

An ideal camping ground will delight the boys and give them an opportunity of indulging in out-door sports.

### Games—Sports of all Nations

National Association of Oarsmen will hold its annual regatta as one of the principal features of the Exposition games.

The National Gaelic Association will control the Irish sports, and the ancient games of Erin will receive due recognition.

Equestrian Polo, Football, Base-ball, Fencing. Rowing and all the various games, representative of all countries will be played by members of National and International Associations. All sports during the Exposition will be designated as Olympic events. One week has been set aside for the more important Olympic contests.

### Physical Training

The principal feature of the Physical Training exhibit will be the lecture course, which has been arranged for the month of August. The subject of scientific physical training will be covered in all its phases and the world's famous lecturers upon this subject have been secured.

## PHYSICAL CULTURE — Continued.

The lectures will also be furnished in manuscript form, constituting a permanent record of the Physical Culture movement. This exhibit is original in its conception, and practically the first of its kind ever held at an Exposition, and it is doubtful if it will be excelled by any future exhibit.

### OLYMPIC EVENTS

- May 12. College Gymnastic Championships.
- May 13. All-Around College Gymnastic Championships.
- May 14. Interscholastic Meet for St. Louis only.
- May 21. Open Handicap Athletic Meeting.
- May 28. Interscholastic Meet for the Schools of the Louisiana Purchase Territory.
- June 2. Amateur Athletic Union Handicap Meeting.
- June 3. Amateur Athletic Union Junior Championships.
- June 4. Amateur Athletic Union Senior Championships.
- June 6-7-8-9-10. Interscholastic Baseball.
- June 11. Western College Championships.
- June 18. Mass Exhibition Turners.
- June 20-25. College Baseball.
- June 25. Olympic College Championships, open to Colleges of the World.
- June 29-30. Interscholastic Championships.
- July 1-2. Turners' International Individual Team Contest
- July 4. Amateur Athletic Union All-Around Championships.
- July 5-7. Lacrosse.
- July 8-9. Swimming and Water Polo Championships.
- July 11-12. Olympic Basketball Championships.
- July 13-14. College Basketball Championships.
- July 15-16. Interscholastic Basketball Championships.
- July 20-23. Irish Sports, Hurling and Gaelic Football.
- July 29. Open Athletic Club Handicap Meeting, Western Association Amateur Athletic Union.
- July 29-30. National Regatta.
- July 30. Championship of Western Association A. A. U.
- Aug. 1-13. Roque Tournament.
- Aug. 1-6. Bicycling. Expert Fancy Riding.
- Aug. 15-20. Bowling on the Green, Y. M. C. A. Athletics.
- Aug. 29.-Sept. 3. Tennis. Olympic Games.
- Sept. 8-10. World's Fencing Championships.
- Sept. 12-17. Olympic Cricket Championships.
- Sept. 19-24. Golf. The World's Champion Players.
- Sept. 19-21. National Archery Association.
- Sept. 26.-Oct. 1. Military Carnival.
- Oct. 14-15. A. A. U. Wrestling Championships.
- Oct. 27. Turners' Mass Convention.
- Oct. 28. A. A. U. Gymnastic Championships.
- Oct. 29. Gymnastic Championships.
- Nov. 7-12. Interscholastic Football.
- Nov. 10-11. Relay Racing, open to Athletic Clubs, Colleges, Schools and Y. M. C. A.
- Nov. 12. College Football.
- Nov. 15-19. Association Football.
- Nov. 17. Cross Country Championships—Afternoon.
- Nov. 21-26. Intercollegiate Football.
- Nov. College Football and Local Cross Country Championships, East vs. West.

## SCIENCE OF MAN

HALL OF ANTHROPOLOGY.

113x263 feet. Cost \$115,000.

(For location see Letter G Exposition Map, Part I, opp. page 5.)

A division of Anthropology is located in what is known as Cupple's Hall No. 1, a structure forming part of the Washington University group of buildings.

### Outdoor Exhibits—Many Strange Races

It is surrounded by a specially constructed park in which are located the habitations of primitive tribes, aboriginal work-shops and early types of buildings.

The more advanced Aborigines will be located near the Indian School, while others will occupy space extending beyond to Arrowhead Lake and the Philippine exhibit.

The outdoor exhibit includes a display of the different types of mankind, Pygmies from Central Africa, giants from Patagonia, Esquimaux from the Arctic regions, Indians from Alaska, Mexico and the various reservations of the United States.

Among the more interesting types are the Ainu hunters and fishers, aborigines from Japan.

### School of American Indians

An Indian School, showing the course of study and manual training will prove an especially attractive feature of this department. At least fifty Indian pupils will be in attendance during the progress of the Exposition.

In the department of manual training may be seen the process of ancient arrow making as well as the more skilled labor of modern Indians.

The predominant principle of this exhibit is that of illustrating the living types of all races, supplemented by historical and archaeological displays.

Manuscripts, books, maps, photographs, pertaining to the various stages of human culture, records of early men, as found in their original form, and numerous other articles and curios combine to make this one of the most instructive departments.

This exhibit is in charge of Dr. W. J. McGee.

## CARNIVAL OF MUSIC

APOLLO AND THE MUSES.

Appropriation \$450,000. The World's Best Musical Talent Represented.

The motif of the department of music is a magnificent pipe organ, located in the Hall of Festivals.

It is the largest organ that has ever been constructed, having 10,059 pipes and 140 stops. The two larger pipes are thirty-two feet long, and a small horse could pass through them. The organ is sixty-two feet long, thirty-three feet wide, and forty feet high.

It is capable of producing 17,179,860,183 distinct tonal effects, and it has 239 movements. If each one of these combinations were drawn every minute, it would take 33,600 years to play them all. 100,000 feet of lumber, and 115 miles of wire, were used in its construction.

The metal pipes took 60,000 lbs. of zinc and 9,000 lbs. of soft metal; the wooden pipes, 35,000 feet of California sugar pine. Two electrical motors of ten horse power each are required to operate the organ.

M. Alexandre Guilmant, the world's famous organist, has been engaged for six weeks.

M. Chas. Galloway of St. Louis is the official organist.

Among other famous organists who will preside are Eddy, Lemare, Dethier, Carl, Gerritt Smith, Parker and others.

Arrangements have been made for the most famous bands in the world to take part in a series of band concerts.

Among those represented are the following: John Philip Sousa, La Garde Républicaine of Paris, the Grenadier Band of London, the Mexican National and the Imperial Band of Berlin. An Indian band of fifty pieces and numerous others have also been engaged.

At stated intervals these bands will combine their forces in one grand orchestral concert of 2,000 pieces.

Choral concerts, composed of thousands of voices will also be given at frequent intervals.

## SPECIAL EXPOSITION FEATURES

GEN. GRANT'S LOG CABIN

Built by himself in 1854.

(In rear of Fine Arts Palace.)

Railway exhibit next to Palace of Manufactures.  
A steam crane lifting a huge locomotive  
Great floral clock, north of Agricultural building.  
Six acres of beautiful roses.  
Two acres of strawberries. containing 400 varieties.  
Outdoor forestry display.  
Ceylon tea garden.  
Mining gulch showing methods of mining and oil drilling.  
Largest boiler plate ever rolled.  
Full size, completely rigged yacht.  
A reproduction of the ancient Mexican city of Mitla.  
Typical frontier trading post.  
Projected terminal improvements in New York.  
Ice plant of 300 tons daily capacity.  
Pavilion built entirely of peanuts.  
Papier mâché whale, 93 feet long.  
Hank Monk's famous stage coach.  
Replica of walls of Ancient Manila.  
A California plank, 11 ft. wide and 60 ft. long.  
A tree eighty feet long. Don't fail to see it.  
Reproduction of Andrew Jackson's Hermitage.  
Robert Burn's historic home.  
Thomas Jefferson's old home.  
General Grant's log cabin.  
An irrigating system covering four acres.  
Giant bird cage, 300 feet long.  
Emergency Hospital.  
Lagoons, two miles long.  
Louisiana Purchase Monument, 100 feet high.  
South-west Pass light house in Liberal Arts building.  
A steam shovel exhibit.  
Edison's personal exhibit of inventions.  
Speech transmitted by electric light rays..  
Ferris Wheel. Model street. Jefferson Guards.

## State Exhibits and Appropriations

**MISSOURI STATE BUILDING.**

312 x 160 ft.

Cost \$250 000.

(For location see *EX Exposition Map, Part 1, opp. page 5.*)

Nearly every state and territory has arranged for liberal representation.

The amounts given below include all money appropriated by State Legislatures, different counties, subscriptions and donations as well as the cost of museums and collections of exhibits.

The disbursements for municipal displays are not, however, included in these figures.

The exhibits are all intensely interesting and the architecture of the buildings is distinctive of the states they represent.

NAME AND NATURE OF EXHIBITS.	Size of Building.	Cost of Building.	Total appropriation.
<b>Alabama</b> —Products.....	....	....	\$ 25,000
<b>Alaska</b> —Esquimaux, curios.....	....	\$13,987	50 000
<b>Arizona</b> —Silver mines.....	26x 44	2,500	60,000

## FOREIGN EXHIBITS

BELGIUM BUILDING.

(For location see **O** Exposition Map, Part I, opp. page 5.)

---

*Appropriation followed by cost of building.*

**Argentina** — \$80,000. This republic is represented by Jose de Olivares. The building is a partial reproduction of the Government palace at Buenos Ayres, and is located in front of the north end of Administration Building.

**Austria** — \$100,000 — \$24,000. Sir Adalbert Von Stirbrl is the Imperial Commissioner-General. This country's pavillon was built in Austria, and shipped in sections to the exposition. The exhibit consists of interior decorations and applied art; also a special railway display.

**Algeria** — \$60,000. This country is represented by a liberal display of its products, minerals, marbles, corkwood, olive oil, dried figs and dates.

**Brazil** — \$600,000 — \$135,000. Brazil's representative is Baron de Rio Branco. Its exhibits in the main buildings consist of feather work, ores, copper and other products of the country.

**Bolivia** — \$50,000. No special pavilion has been erected, but it is liberally represented with a good exhibit of its products.

**Belgium** — \$100,000 — \$75,000. Commissioner-General is Mr. Jules Carlier. The government has set aside 100,000 francs for its live stock display. More than 100 artists are represented by at least 300 pictures and pieces of sculpture. It is expected that the Crown Prince and his wife will be in attendance some time during the exposition.

**Canada** — \$100,000 — \$30,000. Canada is represented by a special pavilion and a liberal space in the various principal buildings.

**Ceylon** — \$80,000 — \$35,000. This country is represented by a special pavilion, and liberal exhibits typical of the country's resources and products.

## FOREIGN BUILDINGS—Continued.

CHINESE BUILDING

(For location see  *Exposition Map, Part I, opp. page 5.*)

**China** — \$350,000 — \$50,000. This is China's first official exhibit at any exposition. The Chinese pavilion, finished in the most fantastic decorations and colors, is a type of the architecture of the country. Many centuries of progress are represented in this display. Over 400 varieties of fans, postage stamps, antique natives from various cities and Chinese states, together with and modern coins, forty life size figures, showing types of other interesting curios, comprise this very complete exhibit.

**Columbia** — \$50,000. No special pavilion has been erected by this country, but its exhibits will be found in the various exposition palaces.

**Cuba** — \$80,000 — \$20,000. A special pavilion has been erected for Cuba, and its display of products is bound to interest every visitor.

**Costa Rica** — \$50,000. Tropical products illustrate the resources of this Central American Republic.

**Denmark** — \$50,000. Represented by Commissioner-General William Arup.

**Ecuador** — \$12,250. Rubber, cacao and sugar with other products are the principal items of the display from the country of the Incas.

**France** — \$1,000,000 — \$250,000. Represented by an exact duplicate of the Grand Trianon of Versailles. A brilliant National display.

**Great Britain** — \$500,000. — \$250,000. A Replica of Orangery of Kensington Palace, designed by Sir Christopher Wren, is England's principal exhibit.

## FOREIGN BUILDINGS.—Continued.

GERMAN BUILDING

(For location see **O** Exposition Map, Part, I, opp. page 5.)

**Germany** — \$1,000,000—\$250,000. Imperial Commissioner-General Dr. Theodor Lewald. The Government Building is a reproduction of the Palace at Charlottenberg. The exhibit from this country includes a fine display of toys, china and tapestry in the Palace of Varied Industries. In addition to art works from the famous German palaces, the beautiful silver service presented the Kaiser upon his accession to the throne, is exhibited; Besides, a liberal representation in the Palace of Forestry, Fish and Game. The chief exhibit is the practical operation of a German railway under government control, and includes four buildings and 4200 feet of track.

**Greece** — \$50,000. Olives, oils and fruits.

**Guatemala** — \$25,000. A typical exhibit of its products. Now that the attention of the entire country is centered upon the Panama canal, exhibits of Central American countries will be especially interesting.

**Hayti** — \$50,000. Coffee, its cultivation, roasting and preparation for market.

**Honduras** — \$5,000. Dr. Salvador Cordova, Consul General at New York, represents this country at the exposition.

**India** — \$105,000 — \$20,000. This exhibit is made by the India Tea Association, which also has charge of Burmah's display. The pavilion is located south of that of Brazil, and is in charge of Mr. Blechynden. The staples and products are well represented.

## FOREIGN BUILDINGS—Continued,

**ITALIAN PAVILION.**

(For location see **O** Exposition Map, Part I, opp. page 5.)

**Italy** — \$100,000 — \$50,000. Italy is represented by a pavilion located near the Administration Building, and across from the Belgian structure.

**Japan** — \$400,000 — \$60,000. The Japanese building is a reproduction of the Castle of Nagoya. Exhibit is in charge of Mr. W. Sugawa.

**Mexico** — \$250,000 — \$25,000. A special pavilion has been erected and exhibit space taken in main buildings.

**Morocco** — \$100,000 — \$20,000. This amount was appropriated for the erection of a special pavilion; but the participation of this country will be in the nature of a very interesting and instructive concession.

**Netherlands** — \$50,000 — \$20,000. A commission has been appointed to take charge of the fine arts exhibit. A display of the country's industries will also be made.

**Peru** — \$25,000. A special pavilion has been erected, and exhibit space taken in the other buildings.

**Portugal** — This country is represented by an exhibit of the royal treasures, and a liberal display of its chief products.

**Russia** — \$180,000. The Russian pavilion is located across from the British Building. The architect is M. J. LeCœur of Paris.

**Spain** — \$50,000. Represented by Senor Perez Triana. Spanish royal art treasures will prove the chief attraction of this exhibit.

**Siam** — \$100,000 — \$25,000. The Siamese pavilion is located between the displays of Mexico and Nicaragua, and is a reproduction of the temple of Bangkok, shaped like a Greek cross. Three gables rise one above the other on each wing of the structure which is surrounded by a typical Siamese Garden. The drawings of the building were made in Siam.

**Sweden** — \$35,000 — \$20,000. The above amount has been appropriated for an art and educational display only. No doubt many will be interested.

### BOARD OF LADY MANAGERS

1. Mrs. Daniel Manning, President, Washington, D. C.; 2. Mrs. Fredrick M. Hanger, Ark. 3. Mrs. John M. Holcombe, Conn.; 4. Mrs. M. H. de Young, Cal.; 5. Mrs. Wm. H. Coleman, Ind.; 6. Mrs. John M. Horton, N. Y.; 7. Mrs. A. L. von Mayhoff, N. Y. City; 8. Mrs. F. P. Ernest, Col.; 9. Mrs. Fannie L. Porter, Ga.; 10. Miss Anna L. Dawes, Mass.; 11. Mrs. Boice-Hunsicker, Pa. 12. Mrs. Belle L. Everest, Kan.; 13. Mrs. Emily Roebling, N. J.; 14. Mrs. J. E. Sullivan, R. I.; 15. Mrs. E. L. Buchwalter, Ohio.; 16. Mrs. Mary P. Montgomery, Ore.; 17. Mrs. Annie McLean Moores, Tex.; 18. Miss Lavina Egan, Secretary, La. 19. Mrs. W. E. Andrews, Washington, D. C.; 20. Mrs. Louis D. Frost, Mont.; 21. Mrs. Margaret P. Daly, Mont.

## VISITORS' DON'TS

- Don't** lose or misplace your ticket or baggage check; a little precaution will save money and annoyance.
- Don't** display jewelry, money or valuables in the presence of strangers or in large crowds. A pin, necklace or watch can easily be taken by a sneak thief or pick-pocket. If exposed to view, however, be constantly on your guard.
- Don't** make inquiries of persons you do not know. When on the Fair grounds, refer to the Bureau of Information or to some of the Exposition attaches. When directions are desired regarding the city, consult a policeman or some reputable merchant or person.
- Don't** get excited or lose your head when purchasing your ticket or checking your baggage. Remember it is always the cool head that holds the key to the situation.
- Don't** fail to take a receipt when paying hotel or boarding house bill's, or when making purchases of any kind, especially when the amount is sufficiently large to justify it.
- Don't** loan money or entrust packages or valuables to strangers because you may not see the person or property again. Don't accept the services of any strangers as guides.
- Don't** make arrangements with any hotel until you have first ascertained its rates, accommodations and character.
- Don't** fail to read carefully rules and regulations, governing round trip tickets. This is highly important.
- Don't** neglect to ascertain the fees for cabs and carriages before engaging the driver. Some services are paid for by the hour; some by the mile. Also take cab and drivers number.
- Don't** blow out the gas but turn it off.

## TELEGRAPH AND CABLE CODE

A message may be composed partly of code words and partly of words used in their ordinary sense. (Each party should have a copy of this code.)

### Hotel Accommodations

- Diadem** Please reserve rooms for me at the — hotel.
- Diploma** Rooms reserved for you at hotel referred to in letter (or telegram).
- Dormouse** Cannot obtain accommodations at hotel designated, but have engaged rooms for you at the —
- Dynasty** Cannot procure good rooms at hotel mentioned; shall I take them at the — ?

### Remittances

- Festoon** Are you in need of money ?
- Flotilla** Money almost exhausted.
- Fossil** If you do not remit, shall be in trouble.
- Fragile** Remit immediately by telegraph.
- Fulcrum** Impossible to remit before —

### Return

- Galaxy** Is it necessary for us to return at once?
- Galvanic** If agreeable, will remain another week.
- Gazelle** Return immediately, business urgent.
- Gelatine** Return as soon as possible.
- Geology** Advise you to hurry home.

### ST. LOUIS STANDARD

Travelers from all parts of the globe can see from the above diagram the exact time in nearly all principal cities of the world when it is 12 o'clock at St. Louis. The difference in time between St. Louis and other large city can be determined at a glance.

EVERY DAY AND WEEK RECORD FOR THE  
ENTIRE SEVEN MONTHS OF THE FAIR.

COMMENCING APRIL 30, CLOSING DECEMBER 1, 1904

## PART 2 — PAGE 47

*See Department 1, page 3, and Department 3, page 83,  
for Complete Information regarding World's Fair  
Grounds and the City of St. Louis, with reliable maps.*

To save time and to prevent confusion, thirty pages have been provided for making and keeping all important engagements.

The most interesting facts regarding the many exhibits of the Fair can be jotted down and quickly referred to. Space has also been provided for keeping a daily or weekly expense account.

Patriotic and fete days, special events and conventions will be found under the proper headings in this department.

**MAP**  
OF THE  
**CITY OF ST. LOUIS**  
SHOWING PRINCIPAL STREETS  
AND POINTS OF INTEREST

*See Department 1, page 3, for Louisiana Purchase Exposition and map. Department 2, page 37, for patriotic and fete days, daily and weekly events.*

1. (Figures as shown above.) Old Fort, built 1794 on site now occupied by Southern Hotel.
2. First Court House (N. E. cor. 3rd and Plum Sts.) Erected 1774. Torn down 1875
3. First brick Church and College, 2nd St. Erected 1820.

The city was named in honor of the Crusader, canonized by the Church, known in history as Louis IX of France. Pier La Clede Ligest selected site for St. Louis in 1763. Sale of Louisiana Territory France to Spain, 1763. August Chauteau and others erected first building, 1764. Treaty receding Louisiana to France, 1800. Purchased by U. S. from France, \$15,000,000, 1803. Upper Louisiana transferred to U. S., March 10, 1804. Postoffice established 1805. First newspaper, 1808. St. Louis incorporated as a town, November 9, 1809. Swept by tornado, 215 deaths, loss \$15,000,000, 1896. Commemoration Louisiana Purchase, 1904.

## The City's Streets

St. Louis is situated on the west bank of the Mississippi river, twelve miles below its junction with the Missouri, and is 432 feet above sea level and 201 feet at its highest point above the Mississippi.

Extending along its banks for 19.15 miles it covers an area of 61.36 miles, or 3,927.62 acres. It is 17 miles long north and south, and 6.62 miles east and west.

The numbers of houses are arranged 100 to each block. Streets running north and south are numbered from Market St. from the river to Jefferson Ave. and LaClede Ave. west.

401 North Broadway would indicate that it is located four blocks north of Market Street. 401 South Broadway would indicate that it is located four blocks south of Market Street.

The numbers on streets running east and west start west from the river. 13th Street would be 1300 west or thirteen blocks from the river. Even numbers are on the south and east sides of sts.; odd numbers on the north and west sides.

The Fair Grounds are numbered 6000 west, just six miles from the river.

EQUESTRIAN STATUE IN MAIN AVENUE OF EXPOSITION  
REPRESENTING LOUIS IX.

## **Financial Status of City**

The assessed value of the city property amounts to \$418,456,300, and the value of its 7155 manufacturing plants is \$389,689,000.

City receipts for 1902 were \$10,432,080, and bank clearings, \$2,506,804,320.

## **Population of St. Louis (From 1799 to 1902.)**

1799.....	925	1870.....	310,864
1822.....	4,800	1880 .....	350,518
1840.....	16,469	1890.....	451,770
1850.....	77,860	1900.....	575,228
1860.....	160,773	1902.....	621,000

## **Climate of St. Louis**

Many people seem to be under the impression that the climate of St. Louis is almost unbearable during the summer months; but a comparison of its temperature with that of other cities shows that such is not the case. The average temperature ranges from 31.1 in January to 79.6 Fahrenheit in July.

The result of a careful record made by the Government Weather Bureau for years shows the following averages.

### **TEMPERATURE AT ST. LOUIS.**

January.....	31.1	July .....	79.6
February.....	36.1	August .....	77.
March .....	43.4	September.....	69
April.....	56.1	October.....	57.9
May .....	66	November....	44.5
June.....	74.7	December..	36.4

## POINTERS FOR VISITORS

**THE FAMOUS EADS BRIDGE.**— Cost \$10,000,000.  
Dedicated July, 4 1874.

---

### Hotels and Boarding-Houses

The first thing to do upon arriving in the city is to secure good hotel or boarding house accommodations. Practically all the leading hotels and boarding houses can be found in Laird & Lee's Pocket Guide and Time Saver, in Part 3.

### City of St. Louis

The next thing to do is to study the map of the city, found in this department. Endeavor to become familiar with the principal streets, buildings and stations. One should be thoroughly familiar with the Fair Grounds and the location of the Union Station so as to avoid being confused.

A list of the churches, parks, places of amusements and other interesting sights of the city will be found invaluable to the stranger.

### Exposition—Exhibits and Grounds

Undoubtedly the best time to enjoy the Exposition sights would be during the forenoon. A trip around the grounds on the Intramural Railway will prove a good introduction to the general arrangement of buildings and exhibits. The morning should be devoted to the principal palaces and their exhibits. The early afternoon can be given to the art galleries or listening to the entertainment in the Hall of Festivals or to the Band concerts. The latter part of the afternoon can be spent in visiting the strange sights upon the pike or Midway, while the evening can be devoted to viewing the gorgeous illuminations.

### Important Suggestions

Familiarize yourself with the contents of this guide. Make out a list of the important things you wish to see in and about the City and at the Fair. It can then be classified and arranged according to dates and the time you have to spend and entered upon the memorandum pages, provided in Part 2. This will not only save time; but will give you a complete record of the trip which will prove interesting to all members of family and friends.

# EXPOSITION AND CITY HOTELS

## LOCATION AND RATES

NEW HOTEL JEFFERSON.

Probably there never was a more determined effort to provide good accommodations than that made by the Universal Exposition and City of St. Louis for the care of the tremendous crowds who will certainly come to see the World's Wonders.

Rates not mentioned can be had by applying to the hotels direct.

Prior to the opening of the Universal Exposition, there were under construction permanent hotels with a capacity of 5,550 guests, and temporary hotels with a capacity of 36,000.

The city's boarding and rooming houses will care for 15,393 guests; private houses, 17,876.

The city has 485 restaurants, twenty of which can care for 33,000 patrons.

Houses which have accommodations for guests will display a World's Fair flag, which will prove of great assistance to the visitor.

The Exposition grounds are encircled by a chain of big hotels, amply accommodating from 300 to 6,000 guests each.

PRESIDENT FRANCIS' BEAUTIFUL HOME.

# WORLD'S FAIR HOTELS

## RAPID TRANSPORTATION FACILITIES

**UNION STATION, ST. LOUIS.**

32 tracks under one roof. — Cost \$6,500,000.

Twenty-seven railroads have terminals at St. Louis, arriving and departing from the Union Station, one of the finest structures of its kind, in the world.

Through trains leave for points on the Atlantic and Pacific coasts and the Gulf of Mexico and other points.

### To Reach World's Fair Grounds

The railroads entering St. Louis have perfected a shuttle train service between the Union Station and the World's Fair Grounds. Tracks have been set aside exclusively for this purpose. Trains will be made up of ten cars, each with a seating capacity of 125 passengers. It is estimated that at least thirty thousand people every hour can be carried in each direction. The cars are constructed with seats arranged across the car similar to summer street cars. The trains will be run one minute apart on a 1250 foot block system.

The cars will have no steps as the floor of the cars will be on a level with the platforms of the tracks.

Through passenger trains will also be run between the Union Station and the Grounds, carrying from 20,000 to 30,000 people an hour.

Provision has been made for handling the local, through and excursion business independently of each other.

## Street Cars Service

The Street Car Companies have provided seven double tracks from the City to the Grounds, and estimate that they will be able to handle 50,000 passengers per hour on each line. LaClede Av. or Market St. cars go direct to the Exposition Grounds from the Union Station, or the visitor may take any car on 18th St. going north, then transfer on Pine or Olive Sts. or Washington Av. to any car going west, having World's Fair sign displayed. Where street cars do not go directly to Grounds, transfers will be issued.

80,000 passengers can be moved from the City to the World's Fair Grounds by means of the combined transportation facilities.

## RAPID TRANSPORTATION FACILITIES—Continued.

### Street Car Stations, at the Exposition

All of the important entrances to the Grounds are passed by well-equipped street car lines. The large terminal station near the main entrance is used by several steam roads.

The Intramural Railway encircling the Exposition is a double track more than six miles in its circuit, reaching all the principal buildings within the Exposition Grounds.

# The Cream of Juvenile Literature

Beautifully Illustrated in Colors.

---

## JUNGLE LARKS

By R. H. GARMAN.

The sensation among the novelties of the season. A delightful collection of scenes from animal life in the jungles, imitating human conditions in a most comical and witty manner. Will afford no end of amusement to old and young. Executed in beautiful color combinations.

Crown 4to. Front and back in four colors, **\$1.00**

## CHILDHOOD CLASSICS

Edited by UNCLE CHARLIE.

Carefully selected nursery rhymes and ditties, Mother Goose melodies and stories, and fairy tales, all in one volume, furnishing the home with a genuine mother's text book, that will be a delight for every member of the family. Eight splendid full-page plates in seven and eight colors. 214 pages. 250 text etchings.

Large 12mo. Cloth. Special cover in three colors, **\$1.00**

## OUR CHILDREN AMONG THE POETS

A comprehensive and very happy selection of poetry pertaining or interesting to the young. As an introduction into American and English literature this volume has no equal. Every home should have it, every child should draw from it its first poetic inspiration. Well arranged and thoroughly indexed. Biographical sketches of principal authors. 100 illustrations. 288 pages.

Crown 4to. Vellum de luxe cloth cover in three colors, **\$1.00**

## FROLICS OF THE ABC

By the Author and Illustrator of BABY GOOSE.

The choicest and most exquisite of children's alphabets. Every page brings new delights. The quaint "letter sprites" rival the old-time fairies in popularity. 10 colors used through the book. 9½x11 inches. Boards, cloth back.

Front and back cover designs in five colors, **75c**

## BABY GOOSE—His Adventures

By FANNIE OSTRANDER.

Designs by R. W. Hirschert. An exquisitely original book of rhymes and pictures. Unequaled in children's literature. Large royal quarto, album shape, superb cover in four colors, **\$1.00**
